

AMIGA™ 1050 MEMORY EXPANSION CARTRIDGE

Double the memory available on your Amiga computer system to 512K in seconds with this 256K byte Memory Expansion Cartridge. Easily installed behind a panel that snaps off the front of the Amiga computer, the 1050 allows users to utilize the more sophisticated programs available on the market that require large amounts of available memory. And it's so easy to use—no switch setting is needed because the Amiga computer system automatically adjusts to the presence of the additional memory.
